**For use in a one-on-one presentation with existing Brinker Capital Destinations ETFh advisors and clients.** Past performance does not guarantee future results. An index is unmanaged and an investor cannot invest directly in an index. Returns are based on actual market values and are weighted accordingly. The returns assume reinvestment of dividends or any earnings. Time periods were selected by Brinker Capital and are shown for illustrative purposes only. Returns are calculated gross (before the deduction) of advisory fees payable to Brinker Capital and any other expenses for services not covered by the advisory fee including administrative costs, which would reduce your return. The net effect of the deduction of Brinker Capital's fees on annualized performance, including the compounded effect over time, is determined by the relative size of the fee and the account's investment performance. The chart to the right depicts the effect of a 1% management fee on the growth of one dollar over a ten year period at 10% (9% after fees), 5% (4% after fees) and 3% (2% after fees) assumed rates of return. Looked at another way, \$10,000.00 invested at 10% for ten years would grow to \$25,937.42; at 9% it would grow to \$23,673.64.

Year	1	2	3	4	5	6	7	8	9	10
10%	1.10	1.21	1.33	1.46	1.61	1.77	1.95	2.14	2.36	2.59
