Design

Tailored investment experiences

Your financial advisor and members of the Brinker Capital Wealth Advisory team will thoughtfully select and design strategies that blend our time-tested investment philosophy with your specific goals and objectives.

The process starts with our asset allocation framework, in which we:

- Evaluate a range of short-, intermediate-, and long-term market factors
- Develop allocation recommendations according to your risk tolerance, tax considerations, time horizon, and spending needs

Effective tax management can help **save 1-2% per year** in returns¹

Our manager research and selection process utilizes individual stocks and bonds, ETFs, and mutual funds within the portfolio to provide:

- Increased tax efficiencies, helping protect you from unnecessary capital gains and offering the ability to harvest tax losses at the individual security level
- Less security overlap to help ensure your portfolio isn't concentrated in any one company, sector, or asset class
- Increased transparency to maintain your comfortable level of risk

KEY
POINT

Fully customized solutions are designed around your needs, whether it's spending, tax efficiency, risk tolerance, or other individual needs.
